

I'm very delighted to provide this letter of recommendation for Techfusion LTD's team leaded by Dimo Hristov. They organized migration of our Cisco products to VMWare environment and performed overall improvements and optimizations.

We had very good communication with them during the entire project and we received detailed explanation of every step of the action plan. They performed the action plan very smoothly.

The provided price by them was very competitive and they did all the work in very short time. We are very pleased with their service.
